Milsek Furniture Polish & Cleaner

is considered by loyal users to be the finest available in the United States

In 1914, Zoltan Csiky, a master cabinetmaker and furniture refinisher, formulated Milsek Furniture Polish & Cleaner. It was used to clean and preserve the furniture now considered heirlooms.

During the Depression, Milsek was sold door to door in cleaned catsup bottles. Mr. Csiky later taught refinishing and many of his students recommended it to their own customers. Currently, the third generation continues the family business.

Loyal users consider Milsek to be the finest furniture polish, cleaner and preserver available in the United States today.

Use it to clean furniture, wood floors, chrome, vinyl, lacquered brass and copper, appliances, kitchen cabinets and many other uses.
